

# Recep DEMIR

## POWERCODERS PARTICIPANT | Fullstack Web Developer

### PROFILE

I started my IT journey by founding and managing an e-commerce business, where I gained hands-on experience with WordPress, WooCommerce, and digital marketing. This practical work sparked my passion for technology and problem-solving. Through continuous learning and a structured IT bootcamp, I developed modern web development skills. My background as a Naval Officer further strengthened my leadership, teamwork, and discipline, which I now combine with my technical expertise to grow as a Full Stack Developer and deliver secure, intuitive web solutions.
